ABOUT US

DreamWorth Solutions Pvt. Ltd. is a Digital Marketing & Website Development Company in Pune, having a group of active & young enthusiasts working together to fulfill the requirements of our clients in the area of Web Hosting, Web Development, website development, Online application development, Search Engine Optimization, Internet Marketing, Online Branding, E-commerce Solutions, and Mobile Application Development, Walk-throughs, Software Development, Email Gateways, Payment Gateway Integration, Enterprise Resource Planning. We are delivering our services from last five years to more than hundreds of clients and are being admired and preferred over others.

Mission

With a growing internet market, the development of Internet marketing companies have also increased. DreamWorth's mission is to boost a dynamics of digital innovation that balances economic performance and human development. Working at the crossroads between technology, business, arts and social change we will make sure that no client gets back with a rue.

WHY US

DEDICATED RESOURCE

We believe in providing dedicated resources to finish things on time.

OPTIMIZED CODE

Optimized code not only help you in ranking but also helps you in reducing the loading time.

SEO FRIENDLY

Enter your keywords and within seconds, the search engine flashes a list before you.

ONLINE SUPPORT

Dedicated resources always available to provide assistance.

ON TIME DELIVERY

Speciality lies with on time delivery to provide satisfaction & make it worth realize.

RESPONSIVE LAYOUT

Independent of the size of device being used, this makes it best suited design for every layout.

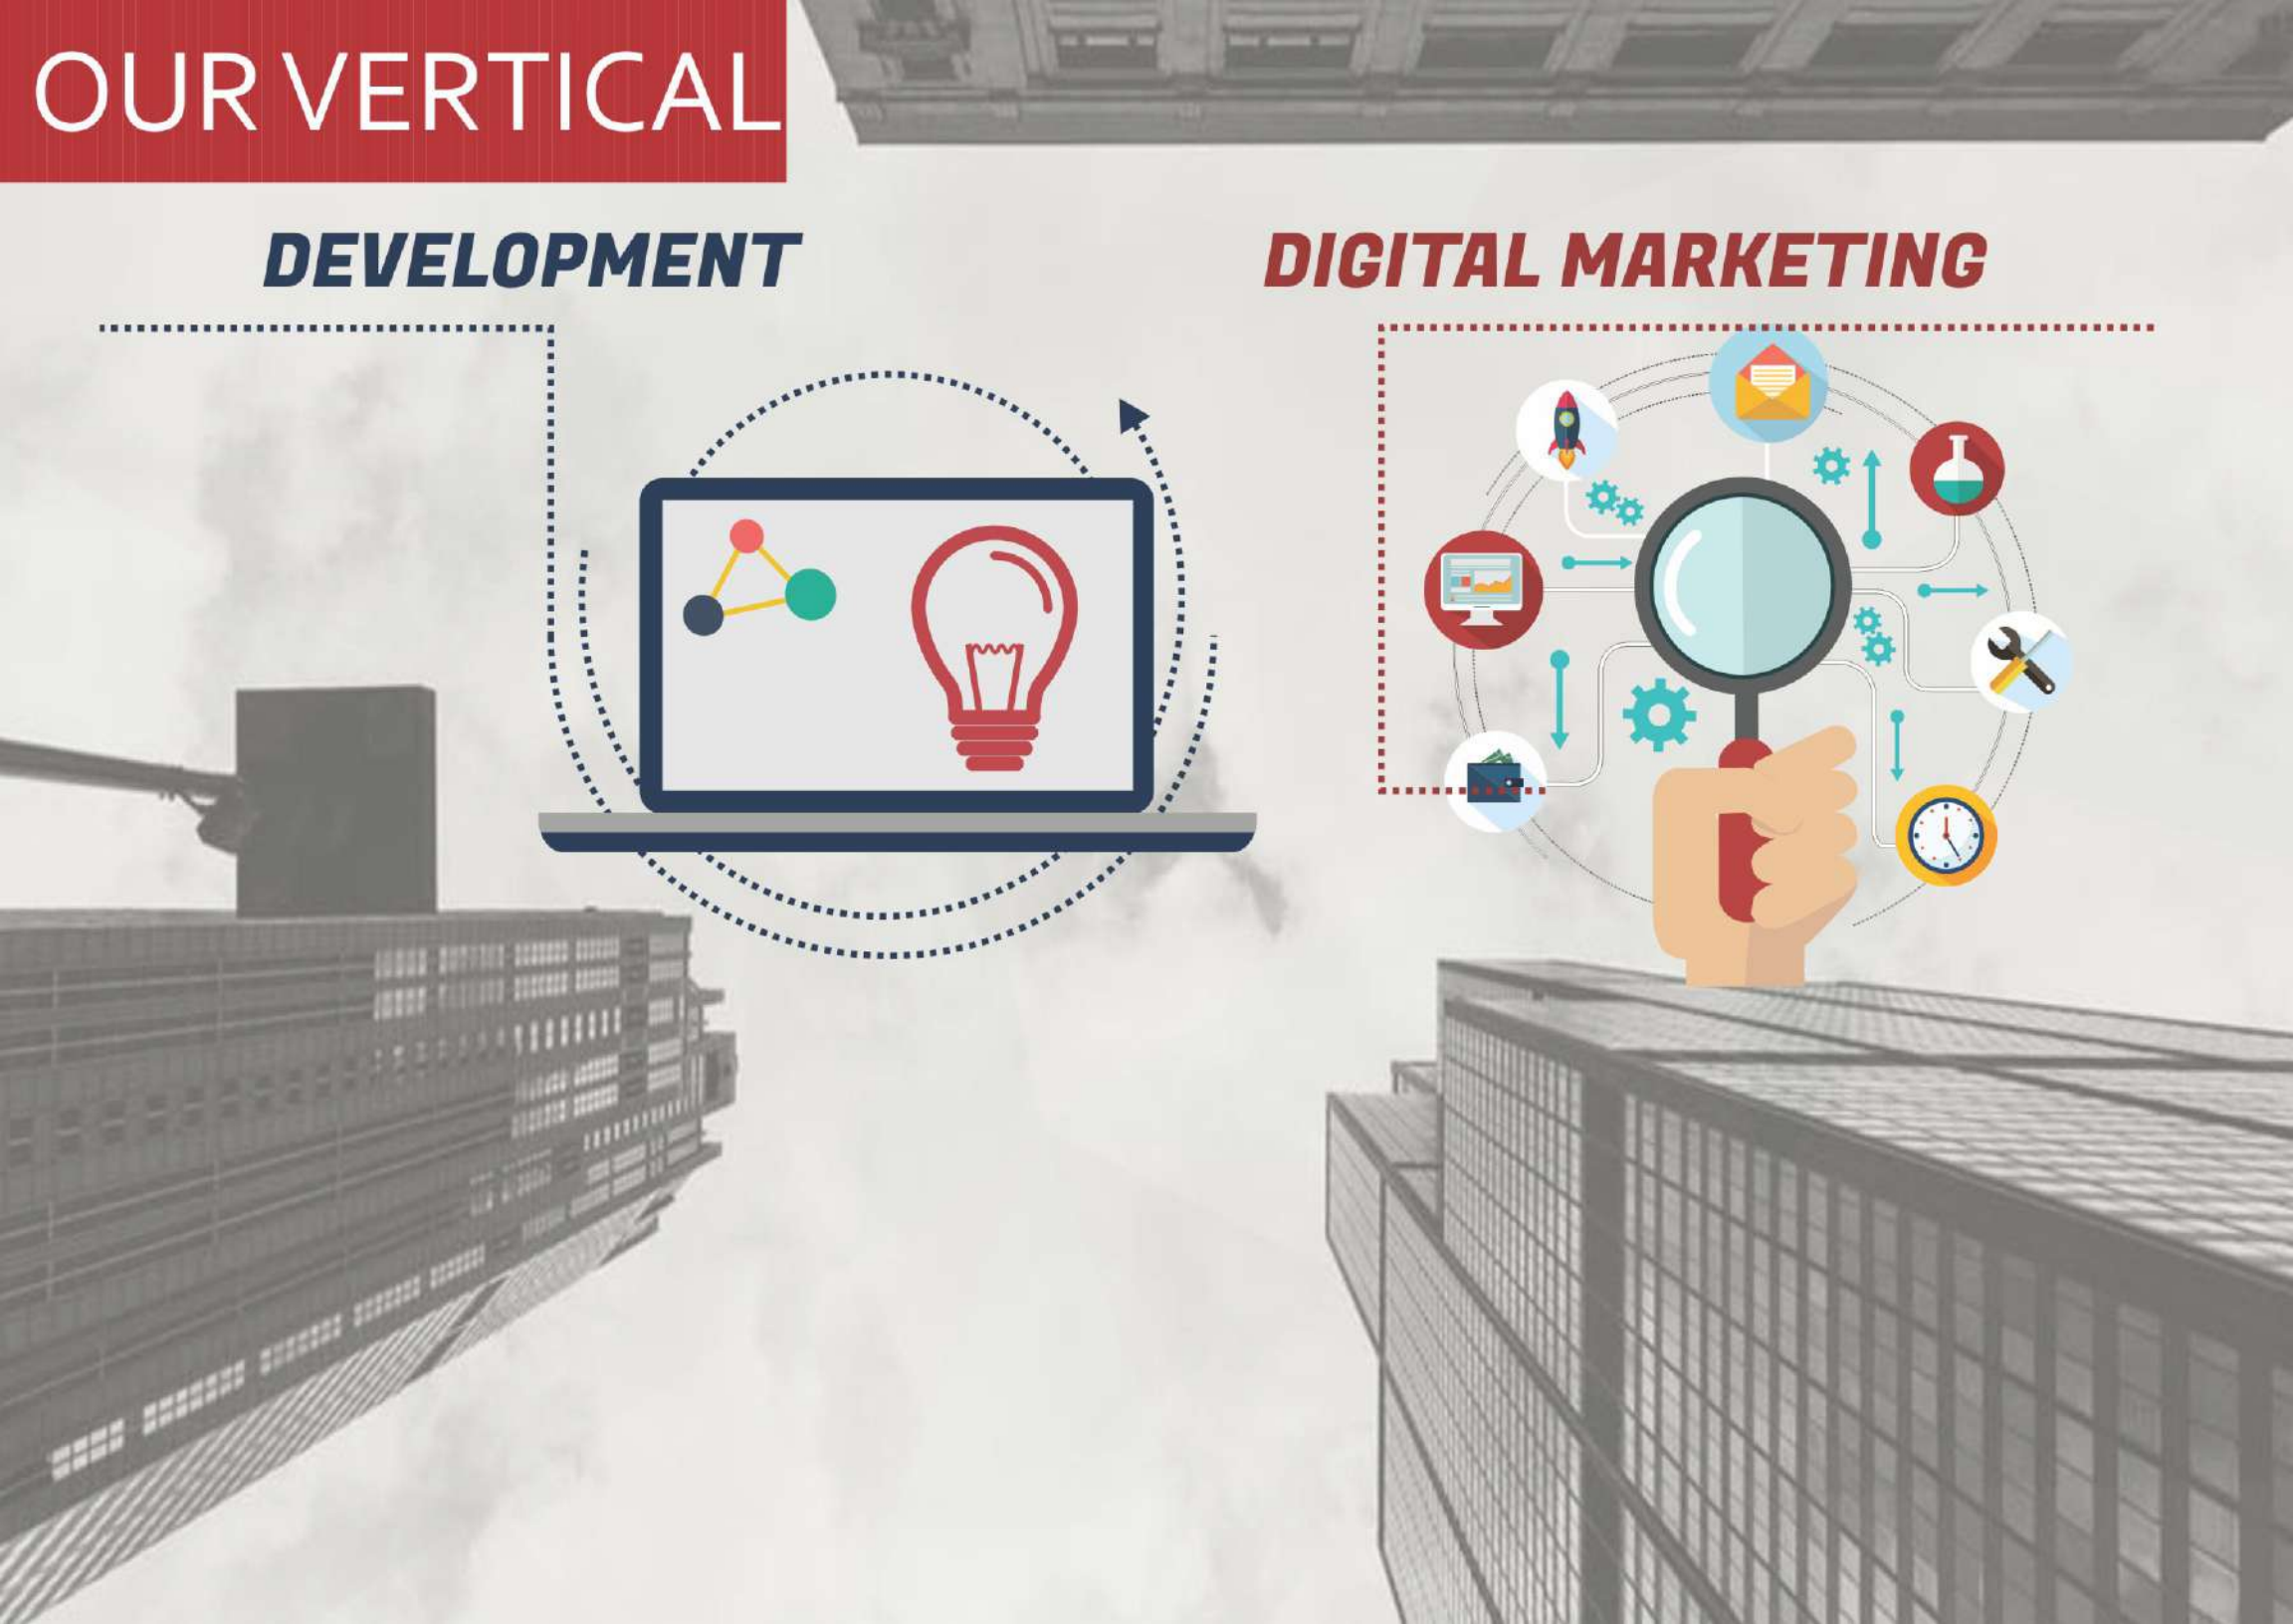

The image is a conceptual graphic divided into two vertical sections. The top left section is titled 'OUR VERTICAL' in white text on a red background. Below this, the word 'DEVELOPMENT' is written in a bold, dark blue, italicized font. A dotted line extends from the top left, framing a laptop. The laptop screen displays a red lightbulb and a network diagram with three nodes (red, yellow, green) connected by lines. A circular dotted arrow surrounds the laptop. The bottom left section shows a perspective view of a modern building with a grid-like facade. The top right section is titled 'DIGITAL MARKETING' in a bold, dark red, italicized font. A dotted line extends from the top right, framing a hand holding a magnifying glass. The magnifying glass is focused on a central point, with various icons (rocket, envelope, gears, clock, wrench, etc.) connected by lines in a circular pattern. The bottom right section shows a perspective view of a modern building with a grid-like facade. The background of the entire image is a cloudy sky.

How We Do

HTML5 + CSS3 + jQuery

Dreamworth is one of the best HTML service providers in Pune. We use latest technologies like HTML5, CSS3, jQuery, AngularJS, Backbone.js etc to make your website perfect & user-friendly.

Magento

Magento is an open-source e-commerce platform written in PHP. Magento gives you the flexibility to customize & extend your platform to create unique, differentiated branded experiences.

CodeIgniter

CodeIgniter is open-source powerful PHP framework with a very small footprint. It has a very rich set of functionality, which will increase the speed of website development work.

PHP + MYSQL

Dreamworth is leading PHP & MYSQL technology provider in Pune. MySQL is the most popular Open Source Relational SQL database management system.

Wordpress Development

At Dreamworth you can get the best WORDPRESS Website in Pune. WordPress is fast, lightweight, and easy to use.

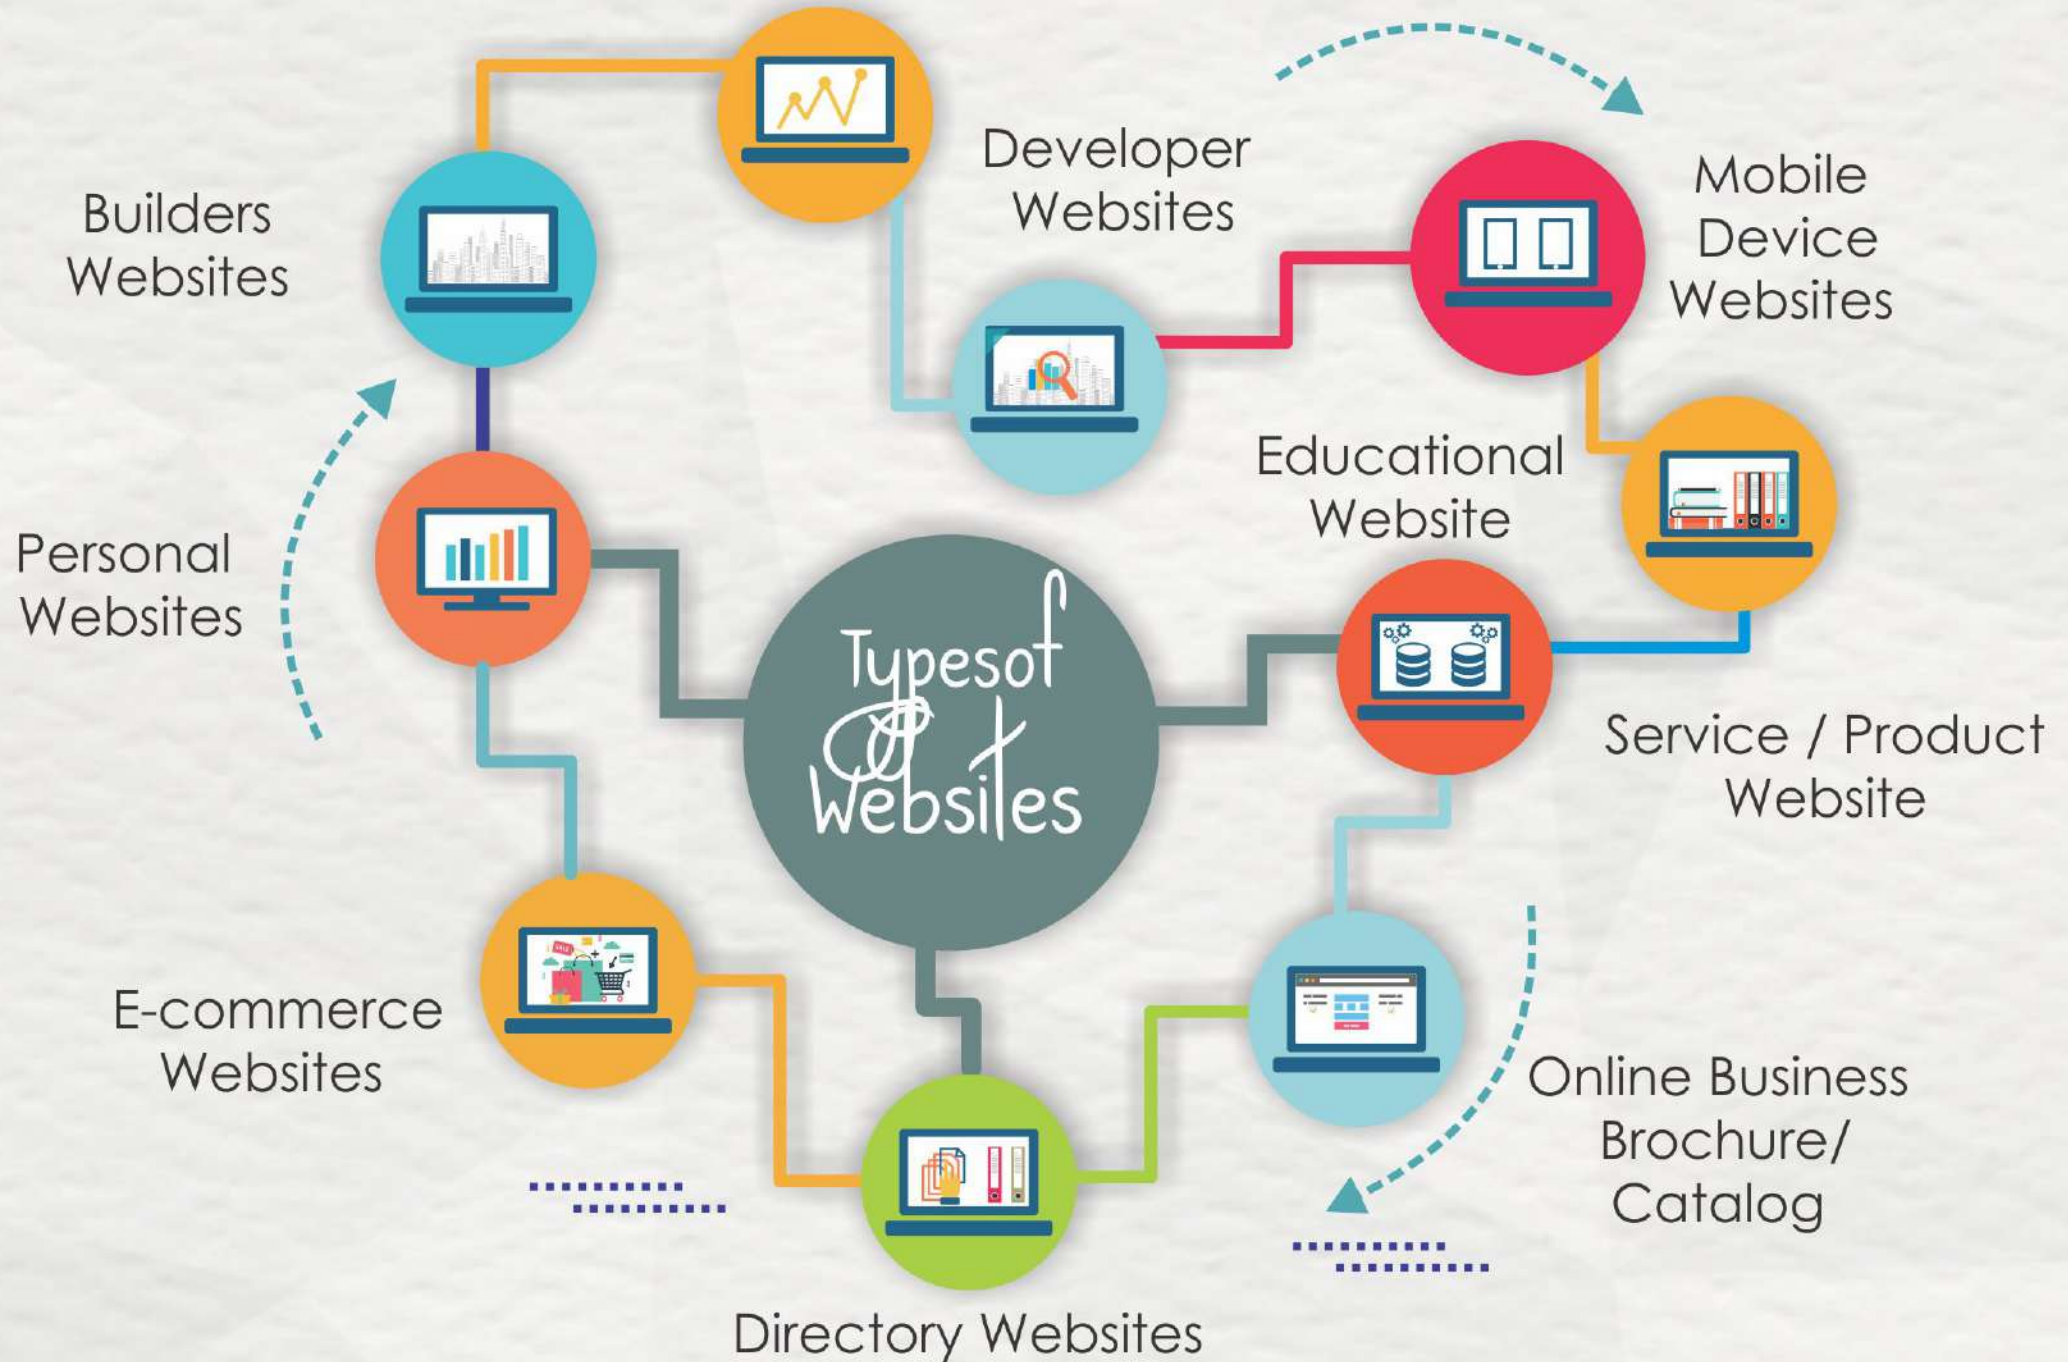

CakePHP

CakePHP makes building web applications simpler, faster, while requiring less code. It is an open-source web framework.

TYPES OF DEVELOPMENT

Writers / Authors Websites

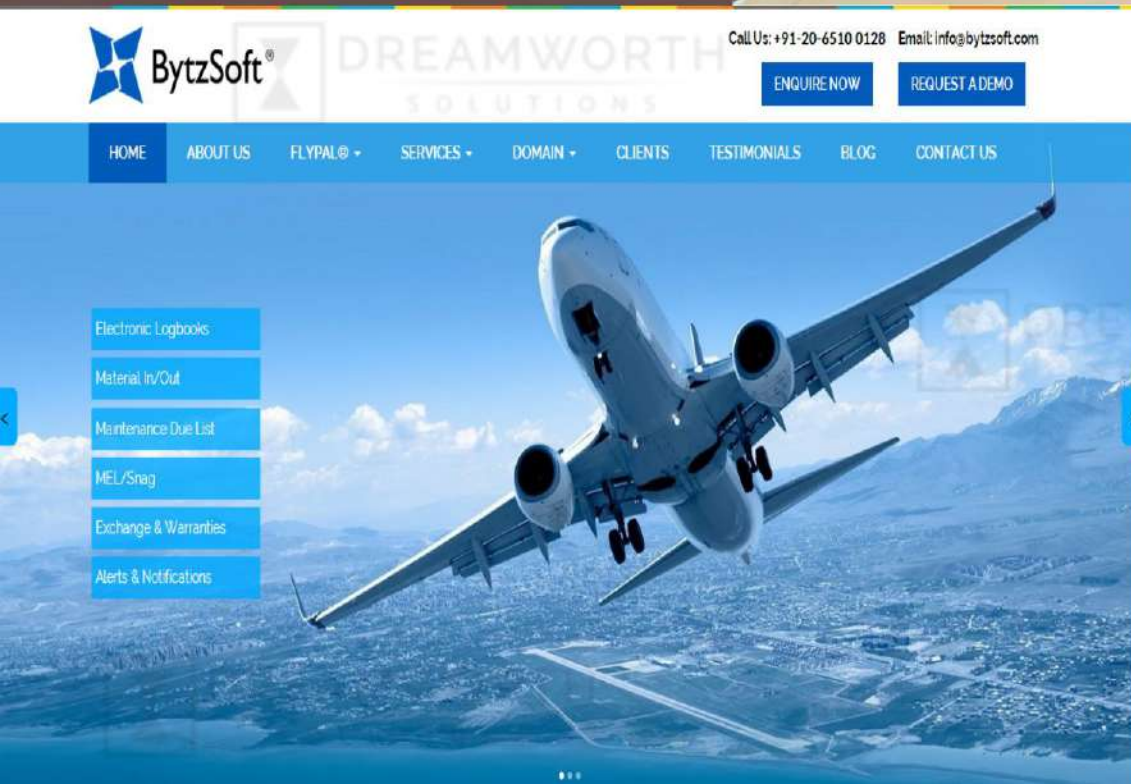

Mobile Responsive Websites

The mobile Web refers to the use of browser-based Internet services from handheld mobile devices, such as smart phones or feature phones, through a mobile or other wireless network. Traditionally, access to the World Wide Web has been via fixed-line services on laptops and desktop computers.

Product Websites

A website is a collection of related web pages, including multimedia content, typically identified .This may include information about a company and its products through text and images.

"The best investment on earth, is earth". – Louis Gleckman

WELCOME TO SHREE SAI DEVELOPERS & REALTY PVT LTD

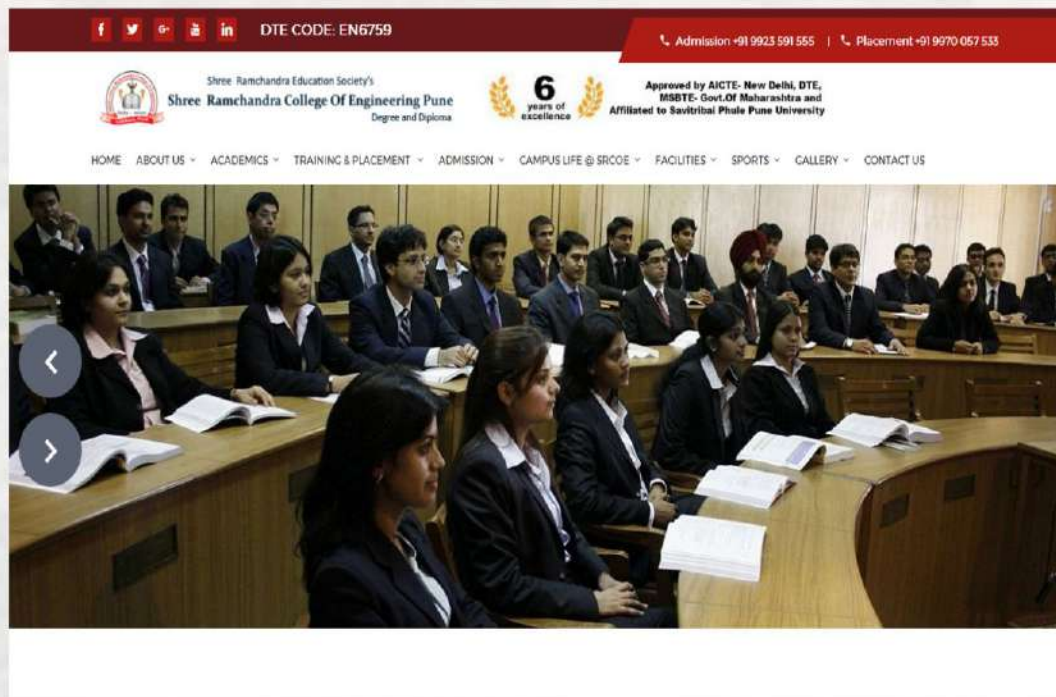

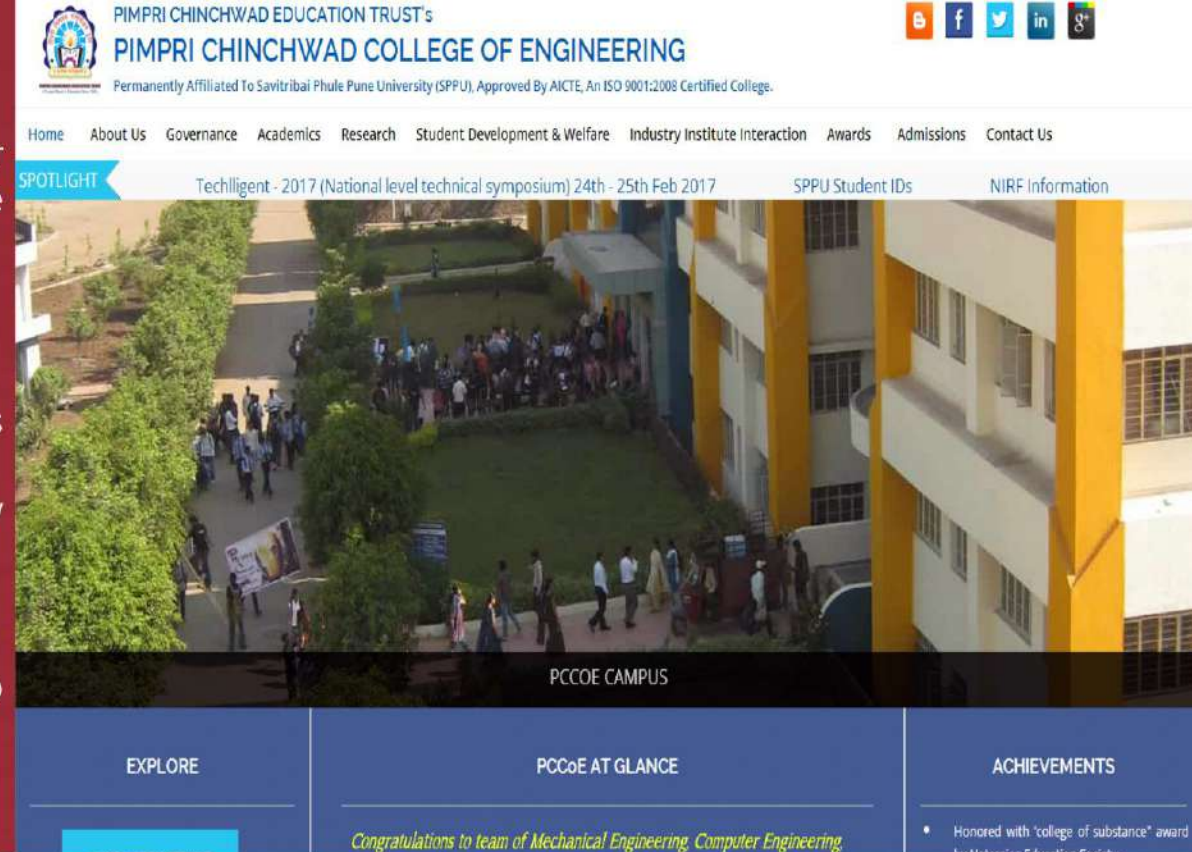

Developer Websites

Property development, is a multifaceted business process, encompassing activities that range from the renovation and re-lease of existing buildings to the purchase of raw land and the sale of developed land or parcels to others. Real estate developers are the people and companies who coordinate all of these activities, converting ideas from paper to real property. Real estate development is different from construction, although many developers also manage the construction process.

College Websites

A college website is any website built, designed, and maintained by or for a college. Many college websites share certain characteristics & have developed guidelines to help college create the best useful websites.

- ▶ Displaying student projects.
- ▶ Directing visitors to other resources on the web.
- ▶ Providing a forum for teachers, administrators, students, and parents to exchange information such as news and calendars of events.
- ▶ Showing that a college is excellent with regard to science and new media in comparison to competitive colleges.
- ▶ Providing a platform for internal college learning activities.
- ▶ Displaying school curriculum and courses.
- ▶ Providing staff and students with an entrance and front-end to documents and resources hosted locally.
- ▶ Creating and showing in public a 'corporate identity'.

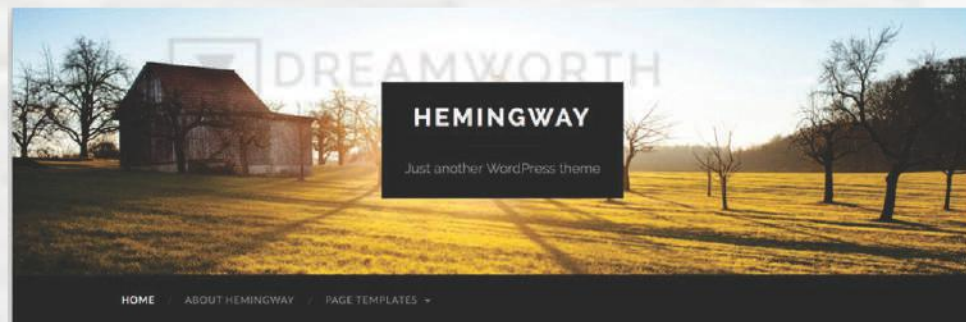

[illegible]

E-Commerce Websites

E-commerce (electronic commerce or EC) is the buying and selling of goods and services, or the transmitting of funds or data, over an electronic network, primarily the internet. These business transactions occur either as business-to-business, business-to-consumer, consumer-to-consumer or consumer-to-business.

The screenshot displays the Amazon India homepage. At the top, there's a navigation bar with categories like Men, Women, Kids, and a search bar. Below this, a promotional banner for an introductory gift is visible. The main content area is divided into several sections: 'ACCESSORIES' featuring watches, bags, and wallets; 'JEWELLERY' with diamond rings; 'BEAUTY' with cosmetics; 'HOME&LIVING' with home decor; and 'FRAGRANCES' with various perfumes. Each section includes product images and a 'Shop Now' button. The bottom of the page shows a 'all SPORTS' banner with images of athletes.

Blog Websites

A blog (a truncation of the expression weblog) is a discussion or informational website published on the World Wide Web consisting of discrete, often informal diary-style text entries ("posts").

As the nation's experts on oceanic and atmospheric science and the lead science agency for oil spills, NOAA was on-scene at the Deepwater Horizon oil spill since the earliest moments of the crisis. Our satellites in space, planes in the air, ships and buoys on the water, gliders under the sea, and scientists on the ground provided mission-critical information to guide the emergency response and now the long-term restoration of the Gulf Coast. Much of that information is now centralized on this website.

NOAA Gulf Spill Restoration

From Response to Restoration, NOAA is There:

NOAA has more than twenty years of experience restoring wildlife and habitats impacted by oil spills, hazardous waste sites and vessel groundings. Our restoration efforts for the Deepwater Horizon oil spill are part of broader, long-term Gulf Coast recovery efforts.

Precast Concrete from High Concrete Group

Architects, general contractors, and construction managers have come to rely on High Concrete Group LLC for projects ranging from parking garages and commercial buildings to sports arenas and educational institutions. High Concrete Group are experts in precast construction, and specialize in the use of precast concrete, where building components are constructed off-site in a factory-controlled environment and delivered to the building site.

With over 50 years of precast experience, we've developed a reputation as one of the leading precast companies in the nation. We can help solve the unique design challenges faced during large and complex construction projects, ensuring they will be completed on time and on budget.

The Many Benefits of Architectural Precast Concrete

Precast concrete from High Concrete Group offers numerous advantages. From a design standpoint, the many available texture, color, and form options along with the capability for brighter, more open, and flexible interiors offer greater design freedom.

From a construction perspective, precast concrete offers superior durability due its strong resistance to the damaging effects of soil, mold, and mildew. Because we cast concrete in a factory setting under tightly controlled conditions, such as our **precast concrete walls**, we are also able to produce

Testimonials

We have been searching for an SEO company with good potential for a while and had gone through many proposals from many companies but none gave us the clear idea as DreamWorth Solutions did. We would definitely recommend DWS team for SEO.

Girish Desai

Dreamworth team did a fantastic job enhancing our company's internet presence and our Google ranking. We were able to significantly reduce our expenditures for Google ads without a drop-off in page hits. If you need SEO, I don't think you can find a service better than Dreamworth.

Satish Chauhan

When we decided to create our company, our vision was to bring to life a website that didn't look like a website. We were thrilled when we found the DWS team. They took our vision and made it come to life. DWS is no doubt the best design company I ever worked with. I will come back again.

Anil Dwivedi

The DWS team made awesome website for us which was responsive, quick to load and good looking. We appreciate the efforts taken by them and wish them all the best for future.

Become the Employer of Choice for IT Professionals

Feb 17, 2015 548 views 28 Likes 10 Comments

It is harder to attract and retain IT professionals right now than at any time in recent memory. Nationally, IT unemployment is only 2.7 percent, and TEKsystems survey data indicates that 46 percent of *currently employed* IT professionals are searching for another job *at least* once a week. I am sure this comes as no surprise to IT leaders, as TEKsystems survey data indicates 92

The Value of Blogging in Today's Digital Space

Are you unaware – about the importance of blogging?

The first blogs appeared in the late 1990s, and now in 2016, blogs are reaching a more sophisticated and developed stage. A lot has changed over these two decades and, indeed, much continues to unfold in the blogging world today. Even though websites have always been the backbone of the internet, they have never gained as much limelight as blogs have over the years. The rage on blogs and content continues to grow in the digital world.

Let's take a look at some of the ways blogs contribute towards [Online marketing](#).

1) Drive's traffic to one's website.

With the hope of people actually reading your content, buying traffic is quite expensive and illegal. Every time a blog is added to a website, a new page is available for Google to index. This means a higher chance to be seen in search engines and in turn driving organic traffic to one's website. It is a hint encouraging Google and other search engines to check one's website on a regular basis for new content

Article

- ▶ Your opinion not allowed.
- ▶ Has interviews and research from credible experts and research firms.
- ▶ Longer than 300 words.
- ▶ Keywords not important.
- ▶ Spelling and grammar are impeccable.
- ▶ More sophisticated writing style.
- ▶ An editor cleans it up for you - published by a print magazine.

The Evolution of Google in the Past 10 Months

Updated Jan 24, 2017

2016 was an intense year, especially when it came to SEO and Google in particular. **The shift from desktop-first to mobile-first**

Up to now, SEOs have considered mobile search to be one of the many specializations of **SEO**, on the same level as local search or international SEO.

That outlook did not change much when, back in 2015, Google had declared AMP. Furthermore, SEOs considered AMP just another "added task" to our execution checklist, and not as a signal of the real motives of Google: **Mobile search is the entire search**. With the proclamation of mobile-first indexing, although, these declarations are now 100% clear, and somehow they resemble a Copernican Revolution: After 18 years of evaluating desktop, now we have to prioritize mobile.

The reason behind this significant change is observable if we look at the source of the search traffic for our sites. **AMP**, then, was the important character in the Google Search-branded storytelling about mobile this year. Google launched AMP in October 2015, and by April already 37% of news sites' articles had an AMP version too, based on to a study by the GDELT Project (Global Database of Events, Language & Tone).

However, the same study attributed that, globally, only 40% of all news sites articles had a mobile version of any kind. The percentage of people mostly using a smartphone is increasing, while the percentage of people largely using desktop is declining with respect to 2015. If you examine the trends in other countries, like some Asian or European ones, the percent of people using smartphones is even higher.

Internet Usage (Engagement) Growth

Time Spent on Desktop Vs Mobile Search

Press Release

All Businesses Can Benefit From Press Release Distribution.

No matter what industry you're in and no matter how small or big your company is, you can benefit from press release distribution. Even if you don't have that "Oprah story", you do have stories that can get you coverage in trade journals, magazines, blogs, podcasts, and other publications that cover your industry. Of course, you can't get that publicity unless you tell your story.

The urgency to adapt to new algorithm updates

Dreamworth's plea towards desolated businesses after the possum update. Don't let your business flop with Possum's local search Desolated by Possum? Are you desolated by Google's Possum Update? The need to understand SEO for local search

Need the best
Website?

freePRnow.com, 10/20/2016 - Pune, Maharashtra: Dreamworth is a leading SEO Company in Pune that provides search engine optimization services acquainted with white hat practices & timely google algorithm & updates. They use up-to-date strategies, techniques and tactics used for ranking you on the search engines. This is not paid marketing and the higher the rank, the greater the chance to be visited by users.

September brought a Google's Possum algorithm update which shook companies all around the world. This is said to be the second biggest update after the Pigeon update in 2014. This means that businesses that are not in city centers or important parts of the city have a chance to be more visible in google's search results. The main aim is to alter local results and to avoid spam in google's result.

Since Dreamworth understands your urgency to get your ranking back, they have come up with tactics that will help your desolated business stabilize. Dreamworth thinks these may be some reasons that your business may show on local search.

1. Appropinquity of a searcher – People searching near the business are likely to see your company.
2. Lifespan of a listing till date – Listings that have been around for a longer time have a high ranking power.
3. Organic ranking - Businesses that have higher organic ranks do well in the local search results.
4. Identical listings - Businesses that have a number of listings may be filtered or suppressed.

For help in regaining your organic search performance get in touch with one of the best SEO companies in Pune – Dreamworth Solutions Pvt Ltd.

India and the Future of Online Marketing

According to a survey-by 2017

600 Million Internet Users

India will have around 600 million internet users that shall create business opportunities to sell services and products to a growing population of tech-savvy internet users.

TRADITIONAL MARKETING IN INDIA

900 Private TV Channels

250+ Radio Stations

There are more than 900 private TV channels and 250+ radio stations in India, which make traditional marketing quite expensive and highly confusing with lots of in-built vacillations. However, in today's world of internet, Digital Marketing is the only one and most guaranteed way of marketing, which is popularly being the most preferred space of marketing communications and related interactions.
